Amazon calculates a products star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers and factors that establish reviewer trustworthiness. Please try again later. Prashant Gandhi 5.0 out of 5 stars And boy i was surprised. The moment I got them I got hooked. These are the perfect pieces money could buy. The bass is awesome, the mids and highs are just perfect. I often listen to country and a bit of reggae fills my day. These look like they are built for audiophile like me. The options of different sizes of ear pieces just makes it a snug fit, no matter what your ear size. The battery life of my buds at 50% volume was well above the 9 hours. Alexa integration means that even if I do not have Alexa Echo, yet I have the assistance in my ear. Really delighted with this. Just skip the spetcism and go for Verve buds 500 right awayBecause I called in customer care for sensor in this like apple pods. He told yes. So I bought but in this no sensor. This is only a Bluetooth for speaking and listening songs etc.

<https://www.euralux.com/images/bosch-wfb-1605-manual-pdf.pdf>

And this product has no buttons and no sensors for call receive and call end. Better than airpods. Definitely worth it. Very poor voice and hearing quality, no clarity. Have to repeat 24 time to opponent to listen. Guys strongly recommended NOT to buy. A little costly than alternatives, but I can say I am not disappointed at all. They fit perfectly in my ear and do not fall off easily. The sound quality is quite soothing, and I Love listening to them while jogging outside. Taking calls on the go is also quite comfortable as the noise cancelation works really well. From jogging in the morning to chatting with friends on video calls or cooking new recipes, I am loving it more and more. They are light and fit easily in the ear. It's definitely a style statement. The charging case is a very useful for carrying and recharging earphones on the go. Sound quality is superb and can be heard easily outdoors. To my surprise, these sound crisp and the sound can get quite loud. I have no problem hearing them while on my bike. The carrying case is very convenient, as the earbuds can be lost easily. Se van conectando y desconectando un lado y otro de manera aleatoria. Es un poco molesto pero te acostumbras. Microfono buena calidad. Te escuchan muy bien. Ergonomia, Un poco grandes, pero aceptable. Sujeccion buena para caminar, pero nada recomendables para hacer deporte. Resumen Buena calidad Precio. Si eres muy pijotero en las llamadas, puede que se quede corto. La sujeccion no es del todo buena. Sorry, we failed to record your vote. Please try again Yo lo compre reacondicionado como nuevo por poco mas de 30 euros. Aun asi, no me lo quedare. A continuacion expongo lo bueno y lo malo LO BUENO La calidad del audio es muy buena, pesan poco y el tamaño del estuche es bastante reducido, lo que hace que su portabilidad sea excelente. LO MALO aunque hay 5 pares de almohadillas de distintas medidas, no hay manera de que los auriculares encagen bien en mi timpano adjunto video.

Debe ser por la forma del auricular, porque yo nunca he tenido problema con otros auriculares de almohadilla. Sorry, we failed to record your vote. Please try again Es importante probar las almohadillas de distintos tamanos que incluye para encontrar la que mejor nos quede. Si se usa una demasiado pequena se caeran seguro. El sonido, sin ser ningun experto, me parece bastante digno. La caja no es excesivamente grande, por lo que se transporta facil. Al abrir la tapa los auriculares se emparejan automaticamente con el movil, y lo hacen rapidisimo. Al cerrar la tapa con los auriculares dentro, ademas de cargarlos, los apaga. Un detalle importante, es que se pueden utilizar por separado. En llamadas, el audio se escucha por los dos y con bastante nitidez. No he notado ningun retraso con el audio al ver videos o peliculas en Youtube o Netflix. La unica pega es que no se puede controlar el volumen desde los propios auriculares. Sorry, we failed to record your vote. Please try again Il bt permette di girare per casa di una settantina di mq, autonomia circa 3h di ascolto stereofonico per carica. Grande flop la difficulta nellindossarli. Se si seguono le istruzioni e si trova la posizione giusta, si riesce a tenerli saldamente tanto da poter scuotere la testa. Viceversa, o se il vostro orecchio ha una forma incompatibile, cadono inesorabilmente. Sorry, we failed to record your vote. Please try again Da ich die Apple Airpods 1. Gen und JBL tune 200 schon getestet habe, und diese fur nicht gut befand, sollten es nun die Versebuds sein. Sound ist prima, klar, definiert, kein Bassbrei. Von der Abstimmung her neutral. Aber auch nur, wenn die Stopfel richtig sitzen. Die Silikon Aufsätze in verschiedenen Groen sind sinnlos, da diese nie tief genug ins Ohr eindringen, um nicht rauszurutschen. Denn der Übergang zum Gehäuse ist abrupt und verhindert ein tieferes eindringen. Es ist nicht möglich 10 Schritte zu gehen, ohne das die Dinger herausrutschen, auer man hat riesengroee Gehorgänge!

<http://www.shipsupply.co.mz/wp-content/plugins/formcraft/file-upload/server/content/files/1626c37c137aea---a-budget-manual-will-almost-always-result-in.pdf>

Wenn man allerdings den R ins linke Ohr tut und L ins rechte Ohr, dann halten die versebuds ohne zu verrutschen. Aber die Wiedergabe ist leider verfälscht, wenn die Aufsätze nicht mehr komplett isolieren. Leider musste ich die zurücksenden. Habe jetzt die Airpods 2. Gen geholt Die sitzen einfach perfekt, aber der Sound ist nicht so gut wie die der versebuds 500. Da es ein Geschenk ist,

stort mich das nicht extrem. Sorry, we failed to record your vote. Please try again Wurde sofort mit dem Handy verbunden. Der klang ist einwandfrei auch uber mein MacMini. Die anderen Ohrenstoppel musste ich nicht benutzen die dran waren sind fur meine Ohren Top. Man kann entweder alle beide benutzen oder nur ein egal ob links oder rechts. Daher alles zusammen 5 Sterne. Sorry, we failed to record your vote. Please try again Ottima autonomia sia delle cuffie che del case. Nota stonata del case bello a vedersi ma scomoda da tenere in tasca per via della sua forma, nulla di importante visto le dimensioni ma comunque potrebbe essere rivisto nella forma. Il suono è ottimo anche se consigli delle impostazioni personalizzate e audio sia in ricezione che in chiamata dispone di 2 microfoni. Speriamo in un aggiornamento in italiano. Sorry, we failed to record your vote. Please try again En muchos casos tienes la sensación de que se va a caer no me ha ocurrido por ahora. Al principio cuesta hasta llevarlos. con la repetición del uso te acostumbras como a todo. En mi caso son un regalo, pero si no lo fueran por ese precio exigiria mas comodidad. Sorry, we failed to record your vote. Please try again La batteria dura il giusto e si ricaricano velocemente. La scatola, anche un po ingombrante, e molto elegante. Un ottimo prodotto di qualità, buoni materiali e funzionamento. Audio e nella norma. Consigliate. Sorry, we failed to record your vote. Please try again De calidad de sonido muy bien pero no se conecta bien con MAC continuamente se conectaba y desconectaba. Sorry, we failed to record your vote.

Please try again El estuche es muy bonito y elegante, pero los audifonos su diseño no me gusto. La batería esta bien, dura lo prometido. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Los uso cada dia para ir en el tren y van muy bien. Además para llamadas funcionan perfectos. Con la caja de carga, pocas veces me quedo sin batería, solo si me despisto mucho. Sorry, we failed to record your vote. Please try again My use is very careful as it is white in color so not sure if it due to the battery charging or something else. Replacement information is highly appreciated. Thank you! Sorry, we failed to record your vote. Please try again. Maybe you can find it in there or find a close application for yours. Hope this Am looking for the MUTE Am looking for the MUTE button. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. Register a free business account Please try your search again later. Up to 3 hours of playtime with an additional 6 hours delivered by the broodingly dark charging case.

Featuring dual microphones, you can opt to use one or both for calling and Alexa voice activation via the VerveLife app. 9h playtime with charging case. Bluetooth 5.0 technology. Dualmic technology for crystal clear calls. Instant automatic connection to device. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Alex Gibson 2.0 out of 5 stars But they dont stay in my ears to save my life. Tried all the different size ear pieces it came with. None of them work. Bending over they fall out. Any running, fall out. I cut grass for side work, every little bump they work themselves loose. The sound quality is very nice and they may work for someone who doesnt do much moving around. Decent while driving. But they aint for me. Maybe I have weird shaped ear holes or something. I have to weigh it down with something pretty heavy that will stay put for

example, an unopened bottle of water. It can be an ordeal depending on the surface and I can forget about it if I don't have a wall to lean the water on to keep it stable. The price was reasonable enough, but for only 4 months of drama-free usage this brand is not the way to go. They don't have volume controls, and they don't fit my ears as well as my other set. I haven't used any apps yet, but, I am able to make calls using Google Assistant. I will use these when I am home listening to music or watching videos and movies from my phone, and use my other set when I am out and about. As most of the features as AirPods do Auto connecting, quick charging, lightweight, and a nice feel in ear. My only problem with earbuds is that the carrying case to charge them on the go is a little bulky in your pocket however definitely recommend for Motorola users.

However, the rubber tip on the ear buds breaks the inside of my ear out. I have tried to use it 3 different times and the result has been the same and now I am unable to return them. bad business. Was given another pair from daughter and they paired every time but I wouldn't waste a dollar on this product I never could get both earbuds to pair at the same time. I either listened to the right ear bud or the left ear bud but never both of them together. Sorry, we failed to record your vote. Please try again Below I would like to highlight my observations and how my life got easier after using this amazing product

- 1 Connectivity Simply the best feature in this product as you just need to pair it with your phone once. The moment I open the box, earbuds are automatically connected with my phone.
- 2 Design and Durability Design of the box and earbuds looks very sleek and the blue LED battery light looks quite rich. Overall design quality also looks sturdy since it's Motorola and they are known to make products which last long.
- 3 Sound quality and calling I found sound quality to be quite crisp and clear. In terms of calling, this is perhaps the best earbuds since the caller was able to hear me loud and clear without any disturbance.
- 4 Battery Battery life of this is simply amazing. I have been using this product for almost a week now and have only charged the box twice.
- 5 Packaging An important and what I loved the most was how beautifully this product was packed. We get multiple options of buds to choose from and Motorola has really made great efforts in terms of overall packing of this product.

5 Price Under 5k, this product is a must buy since it's not only branded but also is loaded with tons of features. Verdict I'm extremely satisfied with my choice and would love to see what Motorola has to offer in terms of wireless technology. A huge thumbs up from me since this is a must have if you are on the go and love music. Sorry, we failed to record your vote.

In time, other brands began to follow the example of Cupertino. In September, at the international exhibition IFA, Motorola unveiled the new Verve Buds 500 wireless headphones, which had already attracted a wide range of users with impressive autonomy. Now the novelty is available in our market, and it's time to devote a review to it, in which we will examine the headset from Motorola from different angles. It is surprising that there is no complete manual for connecting headphones, but we will tell you about it in a separate paragraph below. And on the review we have today is the last. In the charging case, the headphones are held on small magnets, which ensures intimate contact with the charging "terminals" and eliminates their frivolous hanging in the box. Another convenient feature of the case consists of four indicators that show the approximate charge remaining of the case itself. If we talk about the headset, then visually it seems somewhat massive. Although it does not interfere with the sock. The main thing is to choose the appropriate size of the ear cushions so that the headphones confidently hold themselves "in the saddle". The emblem of the manufacturer proudly flaunts on the case facade, as well as the only indicator that shows what mode the headphones are in at the moment. When the headphones are in pairing mode, you can see the flashing red and blue indicator. Discharged headphones blink red, the standby mode is blue, and a steady red light turns on while charging. The button is multifunctional and recognizes several types of pressing. For example, to turn on the headset, you will need to hold the button for 2 seconds. In order to turn on or stop playing music or answer a call, one click is enough. Double click will switch to the next track, and triple pressing a button on one of the headphones will help you return to the

previous one. Simple, convenient, and this type of control does not have to get used for a long time.

You can find it on the official site, because the instruction that comes in the kit, for some reason, describes only the pairing between the headphones and the headset mode. If you believe that for the initial connection of the headset, you just need to turn on Bluetooth on your smartphone and select Verve Buds from the list of detected devices, then do not be in a hurry to rejoice. Ahead we are waited by several consecutive steps that will help us connect the headphones to the smartphone correctly. Otherwise, the pairing between the "ears" will not occur and only one earphone will work. The thing is that headphones play different roles. The right one is considered primary, and the left one is secondary, and the connection is made using the left earpiece. Take them out of the case. Select "Vervebuds 500" in the menu that appears. To do this, just hold the button on one of the headphones for ten seconds. When the indicator turns purple, the headphone is "reset" and you can start pairing with another device. Motorola Verve Buds 500 are friends with Alexa, Google Assistant and Siri, which means that they can work with both Android-based smartphones and the iPhone. For those who are already accustomed to voice assistants and use them often, this feature is very convenient. Now there is no need to "shout" into the phone or other device, it is enough just to make a clear and quiet request and be sure that you will be "heard". This means that Verve Buds are on full alert and you can immediately put them on and listen to your favorite music. That is, there is no need to reconnect them every time. Frankly, when connecting for the first time I was very disappointed with the sound quality. After installing AIMP, things did not get better. Equalizer became available, but globally the sound has not improved. In any case, the need for all equalizers has disappeared in principle. But let's be frank the Motorola Verve Buds 500 is not an audiophile device.

They are very good at playing vocals, ballads, jazz and other lounge music. But as for more dynamic music trends, such as electronic or "heavy" music, I personally lack their capabilities. And bass, of course, although they are. And goosebumps do not "run." Let's just say, not Sony and not Sennheiser. Although in the ranks of these "monsters of sound" there are no headsets in such a compact and convenient form factor in which the Verve Buds 500 is made. But, perhaps, this is just a matter of time. Each of us has different preferences in music and sound in general, so it's better to hear and draw conclusions for yourself once. The charging case increases this figure threefold, with the result that we have a workable headset for nine hours. And if you use headphones only on the road, then you can safely count on a few days of work. Comparing everything with the same AirPods, whose autonomy is about five hours, the Verve Buds 500 give them a head start. One earpiece is in the case, and the other is always ready to take a call or call a voice assistant. Music in one ear, of course, uncomfortable listening. But for those who are often behind the wheel, the device is a great help. BAD STUFF the manual does not have a full connection guide and I would like a better sound but this is a question for all such headphones. In one fell swoop, she solves many problems from the eternal disentanglement of headphones to "communication" with voice assistants. But to wait from her unreal musical sound as well as from other headphones of this type is still not necessary. The rest of the headphones show outstanding results, so the headset will definitely find its fans. In certain genres of games, this is an important tool that allows. Huami has been producing wearable electronics. Of course, the. Something went wrong. Good points Nice looking handset. A good clear line, no crackling etc. Easy to use. I haven't looked at the manual once and I have managed to set up, no problem.
